

EN

HORECA
To the next level

Research, innovation, attention to detail: these are the distinctive features of Payper's menu of creations, dedicated to chefs and Horeca professionals.

A collection of **tailored** garments, with **design** solutions **custom-made** to meet the tastes and demands of those who make catering their art. This is how the **Lockable Rever** was born, an ingenious opening system protected by a **patent**, which distinguishes the jackets of "stellar" chefs, true **designer choices to wear**.

This innovative system is designed to give authentic experiences to those seeking perfection in the details. Every detail, from the shape outline to the arrangement of buttons and buttonholes, has been carefully calculated to allow you to easily transform an elegant mandarin collar into a modern and comfortable V-neck. With one simple movement, the unbuttoned flap locks precisely on the opposite side, offering a professional, neat and distinctive look. Because, as with gourmet dishes, **a beautiful presentation is part of the experience**.

Each model, the result of a **careful stylistic study**, is designed to reflect the personality of the user, **ranging from exquisite elegance to lines with more casual flavours**.

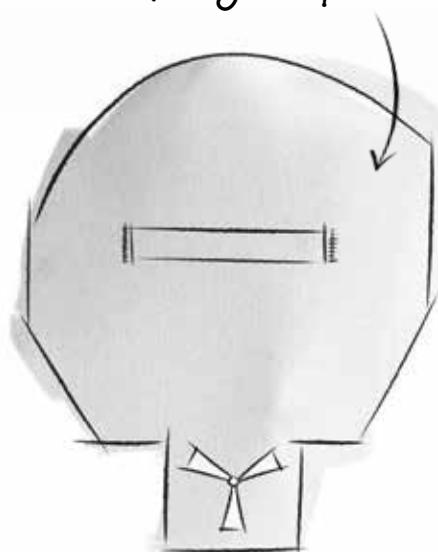

Needs:

- To open the neckline of your jacket when it's hot
- + Move freely, without hindrance
- + Stay elegant and neat

Signature Payper patch
= A must-have mark
of originality!

Idea:
Design the correct position of buttons
and buttonholes, to offer an innovative opening
solution, by fastening the flap to the opposite side
= Lockable Revers.

Sustainable cotton,
innovative fibre,
for a new level
technology.

LYCRA®, T400® and COOLMAX®
are trademarks
of The LYCRA Company

Latest generation high-performance fabrics, characterised by the extraordinary combination of sustainable cotton, **Lycra® T400®** fibre and the unrivalled **COOLMAX®** technology.

The collection come in different textures:

- 190g/m² twill
- 160g/m² twill
- 150g/m² ripstop

As in every recipe, the choice of ingredients makes the difference: for this reason Payper has selected excellent raw materials, to create garments with high aesthetic and functional value.

The **Lycra® T400®** fibre, with **intrinsic elastic and shape-recovery properties**, and the **COOLMAX®** technology, the ultimate solution in terms of breathability, make Payper's HORECA line unique.

The fabrics thus ensure incredible **freedom of movement**, associated with a pleasant sensation of **freshness and softness** to the touch, together with excellent **resistance to tearing** and even to the most intense washes, for a uniform that maintains its qualities and a **perfect fit over time**.

PROFESSIONAL
Regular Fit

Symbols

Each item in the catalogue is accompanied by graphic symbols that offer an overview of the stylistic features and the technical properties of the garment. In order for these to have greater durability, keeping their performance intact, we recommend washing, drying and ironing after having viewed the maintenance symbols shown on the internal label (care label). To make it easier to understand all the symbols, the explanatory legends are shown below.

Man: identifies an item with a male design.

Lady: identifies an item with a female design.

Match Man + Lady: identifies the availability of the product as matching for men and women.

Big Size: it identifies the availability of at least one size bigger than XXL.

Professional Regular Fit: identifies a product with a regular fit, adapted to the needs of "professional" products.

Sartorial Style: identifies a product made with tailored details and finishes.

Stretch: it identifies a material which is at least partly elasticised making the product more flexible and comfortable.

Fresh'n' Soft

Fresh'n' Soft: identifies a product made with soft and breathable fabrics.

Super Strong

Super Strong: identifies a product made with particularly resistant fabrics.

Xtreme Wash

Xtreme Wash: identifies a product that is extremely resistant to high washing temperatures.

Pro Label: industrial drum washing and drying. Process number 8.

Registered community design

Identifies a product whose design or model has been registered with EUIPO, the European Union Intellectual Property Office. The registered Community design (RCD) is an exclusive right conferred for "the design of a product or part thereof, resulting in particular from the characteristics of the lines, outlines, colours, shapes, surface structure, materials and/or embellishments". The exclusive right totally prohibits the use of the design by other manufacturers in all States of the European Union.

Lockable Rever designed by Payper®

Lockable Rever

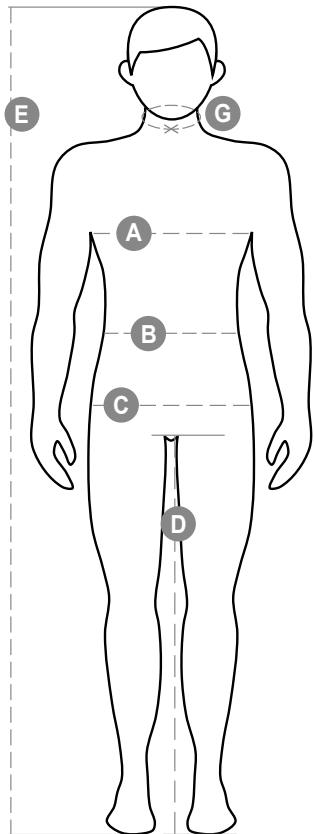

Innovative closing system for double-breasted jackets, patented by PAYPER as a utility model. The flap of the jacket that can be opened can be fastened to the chest on the opposite side with a button, transforming the elegant Mandarin collar into a modern and comfortable V-neck. Thus, the user who feels the need to cool off can undo the jacket, moving freely and without hindrance, while maintaining an elegant and neat look. The meticulous sartorial calculation on the positioning of all the buttons, for both the men's and women's versions, ensures the perfect fit for each size.

Size guide

Wearing the correct size of a garment is essential for feeling comfortable in any situation. To identify it, we recommend taking your measurements in direct contact with the body and then consulting the following tables, which also show the conversions between the different size scales.

Horeca items are designed with a regular professional fit, with a tailored cut, with more marked and defined lines, to harmoniously follow the shape of the body.

The gap between sizes is smaller than in the traditional Payper size tables, to offer elegant garments that meet the needs of users. If in doubt between two sizes, we recommend choosing the slightly larger one, to ensure greater comfort. We suggest trying on the desired item before proceeding with the purchase and customisation. In fact, the fit can vary depending on the model, the fabric and the treatment carried out.
